David – Could you please clean up the comments in the document a bit as well as the cumulative section, and then send the draft risk assessment to Dana, Don, Greg, and RD for their comment – please cc me in your e-mail to them. And add that this is going to everyone at the same time because of the quick turn-around required, and that the team is still working to clean up odds and ends. Thanks. Mike

I added the cumulative language from Phil to that section, but you'll have to fix up the footnotes. So we should be almost there. BTW, I just invited you to the 11:00 am team meeting.

That should be most of it. The only other item is branch review of the dietary memo which I uploaded with the RA, we are not expecting much as this was a minor update to the dietary from reg review.

Subject: Aldicarb again

Team – I've looked through the assessment and added my comments which are minimal. It appears that we have an EFED memo to reference, and are waiting for finalization on only 2 things: a BEAD memo we can reference, and a more detailed paragraph on cumulative that can be inserted. Is there anything else I'm missing? Thanks. Mike
